

# NYSESA Professional Fire Alarm Design Course - 2018 Registration Form

This 14-hour course, followed by a two-hour examination, provides specific training to develop an installation plan based on field conditions and project requirements. Plans should be developed by persons experienced in the proper design, application, installation, and testing of commercial fire alarm systems. Therefore, the primary focus of this course is to provide a more advanced level of knowledge gleaned from national codes regarding proper detector selection, required coverage for specific building occupancies, as well as documentation and plan submittal requirements. The course will provide information needed to prepare commercial fire alarm system plans and submittal documents, and includes a "hands-on" portion where students will use their new knowledge to design a fire alarm system based on criteria provided.

**Prerequisite:** Those wishing to attend this course **MUST** have taken the **Fire Alarm Installation Methods course**. The **Life Safety Code course** is also strongly recommended.

Please check which course you are registering to attend

Rochester - February 19-20

**PRE-REGISTRATION IS REQUIRED...**

### The Course of Study Includes:

Determine Protection Criteria, Requirements by Occupancy Type, System Design Requirements Owner's Protection Goals, Other Hazards, Defining Project Scope, System Types and Features Control Function Interfaces, Choosing Initiating Devices, Choosing Supervisory Components, Choosing Notification Appliances, Fire System Programming, Submittal Package Preparation, Other Important Documentation, Plan Preparation Project

**Certifications available:** Certified Fire Alarm Designer \*\*

**\*\* Must possess CFAT Certification & 36 mo. experience to be eligible**

### GENERAL COURSE INFORMATION
